English - B2+

EXPERIENCE

SYNERGY WAY Lviv, Hybrid

Frontend Engineer *Apr 2024 – present*

- Developed responsive web and mobile applications using Vite, React, React Native, Next, TypeScript, Vitest, Jest, Playwright, Tailwind CSS, shadcn/ui, and React Native Reusables.
- Integrated real-time data handling using SSE and WebSocket, interactive interfaces with Infinite Table, FlashList, Trading View, ECharts, Skia, etc.
- Implemented JWT and Google authentication, enabling secure user access and improving overall app reliability.
- Optimized data fetching by integrating TanStack Query with Axios to manage advanced caching strategies, reducing redundant API calls and improving load times.
- Implemented error boundaries with Sentry for dev/beta/prod monitoring and debugging.
- Built sophisticated animations and smooth transitions on landing pages to enhance engagement and visual appeal.
- Integrated Stripe for seamless and secure payment processing ensuring compliance with best practices.
- Implemented real-time chat functionality using Stream Chat SDK for seamless cross-platform messaging.
- Identified and reported bugs in open-source libraries, contributing to library improvement and ecosystem stability.
- Participated in client meetings to gather requirements, present progress, and align technical solutions with business objectives.
- Updated CI/CD pipelines, configured SOPS, Dependabot, and CodeRabbit for secure automated workflows, and set up Docker DevContainers for consistent development environments.
- Delivered polished UIs both with and without design mockups, maintaining visual fidelity with Figma and exceeding client expectations.

FREELANCE Remote

Frontend Engineer *Mar 2023 – Mar 2024*

GitHub

Independently developed a full-featured web application from scratch to production using React, Material UI, and styled-components with pixel-perfect Figma implementation and fully responsive layouts ensuring high-quality UI/UX.

- Integrated Monobank API for secure payment processing and Nova Post API for delivery management with dynamic area, city, and warehouse selection dependencies.
- Built a JWT-based authentication system for secure user access and session management.
- Optimized performance, API interactions, and data flow for seamless user experience in production.

PROGA TECH Remote

Frontend Engineer *Sep 2022 – Feb 2023*

- Developed responsive Progressive Web Application using React, TypeScript, Material UI, and styled-components with optimized rendering performance and pixel-perfect Figma fidelity.
- Implemented JWT authentication and integrated Axios for secure API communication with error handling and data fetching optimization.
- Built interactive modals, dynamic forms, dashboards, and reusable UI components with consistent theming across multiple responsive pages.
- Created engaging landing pages featuring animations and micro-interactions to enhance user experience while reducing load times and improving overall application responsiveness.

EDUCATION

IVAN FRANKO NATIONAL UNIVERSITY OF LVIV Lviv

Master of Computer Science *Sep 2020 – Dec 2025*
